SLIDING DOOR PROFILE

The sliding door profile allows storage opportunities to be created inside your T3Affinity structures. The profile is fitted into the channel of beam extrusions (AYEB). Semi rigid panels are then slide directly into the profile.

AYER 19T / AYA-3004 (CODE)

19MM GRAPHIC POLE

Designed to allow for banner graphics to be seamlessly integrated into a T3Affinity structure. The unique design of the moulded end fitting allows for the graphic pole to be mounted on an adhoc basis.

CABLE TRUNKING PROFILE

The cable trunking profile is clipped into place on either T3Affinity beams or posts where there is exposed cables and wires on your display. The front hinged panel is then unclipped and the wiring fed into place and secured. This unique solution allows for your

AYER 25T / AYA-3006 (CODE)

CLOTHING RAIL

Used in combination with either the AYA - 4001 or AYA - 4003 brackets. It allows for a clothing rail or shelving solution to be created. The AYER 25T can be cut to a variety of lengths, allowing for users to have complete design flexibility when it comes to the size of the clothing rail/display shelf. The retro-fit design of the solution also allows it to be installed on an adhoc basis.
